DETAILED ACTION

Allowable Subject Matter

- 1. Claims 1, 7-8, 14-15, 19-20, 26, and 29 are allowed.
- 2. The following is an examiner's statement of reasons for allowance:

The present invention describes a modem and a method comprising a carriergroup receiving means configured to receive signal-to-noise ratio (SNR) parameters relating to a plurality of carriers; a carriergrouping means configured to group the plurality of carriers into a plurality of dynamically variable size carrier groups based on the SNR parameters, to determine a carriergroup SNR parameter for each of the plurality of dynamically variable size carrier groups, the carriergroup SNR parameter being a worst case SNR parameter from among the SNR parameters corresponding to the plurality of carriers within each of the plurality of dynamically variable size carrier groups, and to determine carriergroup bitloading and gain parameters for each of the plurality of dynamically variable size carrier groups based upon the worst case SNR parameter for each of the plurality of dynamically variable size carrier groups; and a carriergroup transmitting means configured to transmit at least one message including the carriergroup bitloading and gain parameters for each of the plurality of dynamically variable size carrier groups. The closest prior art, Peeters et al. (US 2001/0012783 A1) discloses a very similar method and apparatus for carrier constellation information in multi-carrier systems but fails to disclose determining a carriergroup SNR parameter for each of the plurality of dynamically variable size carrier groups, the carriergroup SNR

parameter being a worst case SNR parameter from among the SNR parameters corresponding to the plurality of carriers within each of the plurality of dynamically variable size carrier groups, and to determine carriergroup bitloading and gain parameters for each of the plurality of dynamically variable size carrier groups based upon the worst case SNR parameter for each of the plurality of dynamically variable size carrier groups. This distinct feature has been added to the independent claims 1, 8, 15, and 20, thus rendering claims 1, 7-8, 14-15, 19-20, 26, and 29 allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SIU LEE whose telephone number is (571)270-1083. The examiner can normally be reached on Mon-Fri, 6:15-3:45 with every other Friday off.
